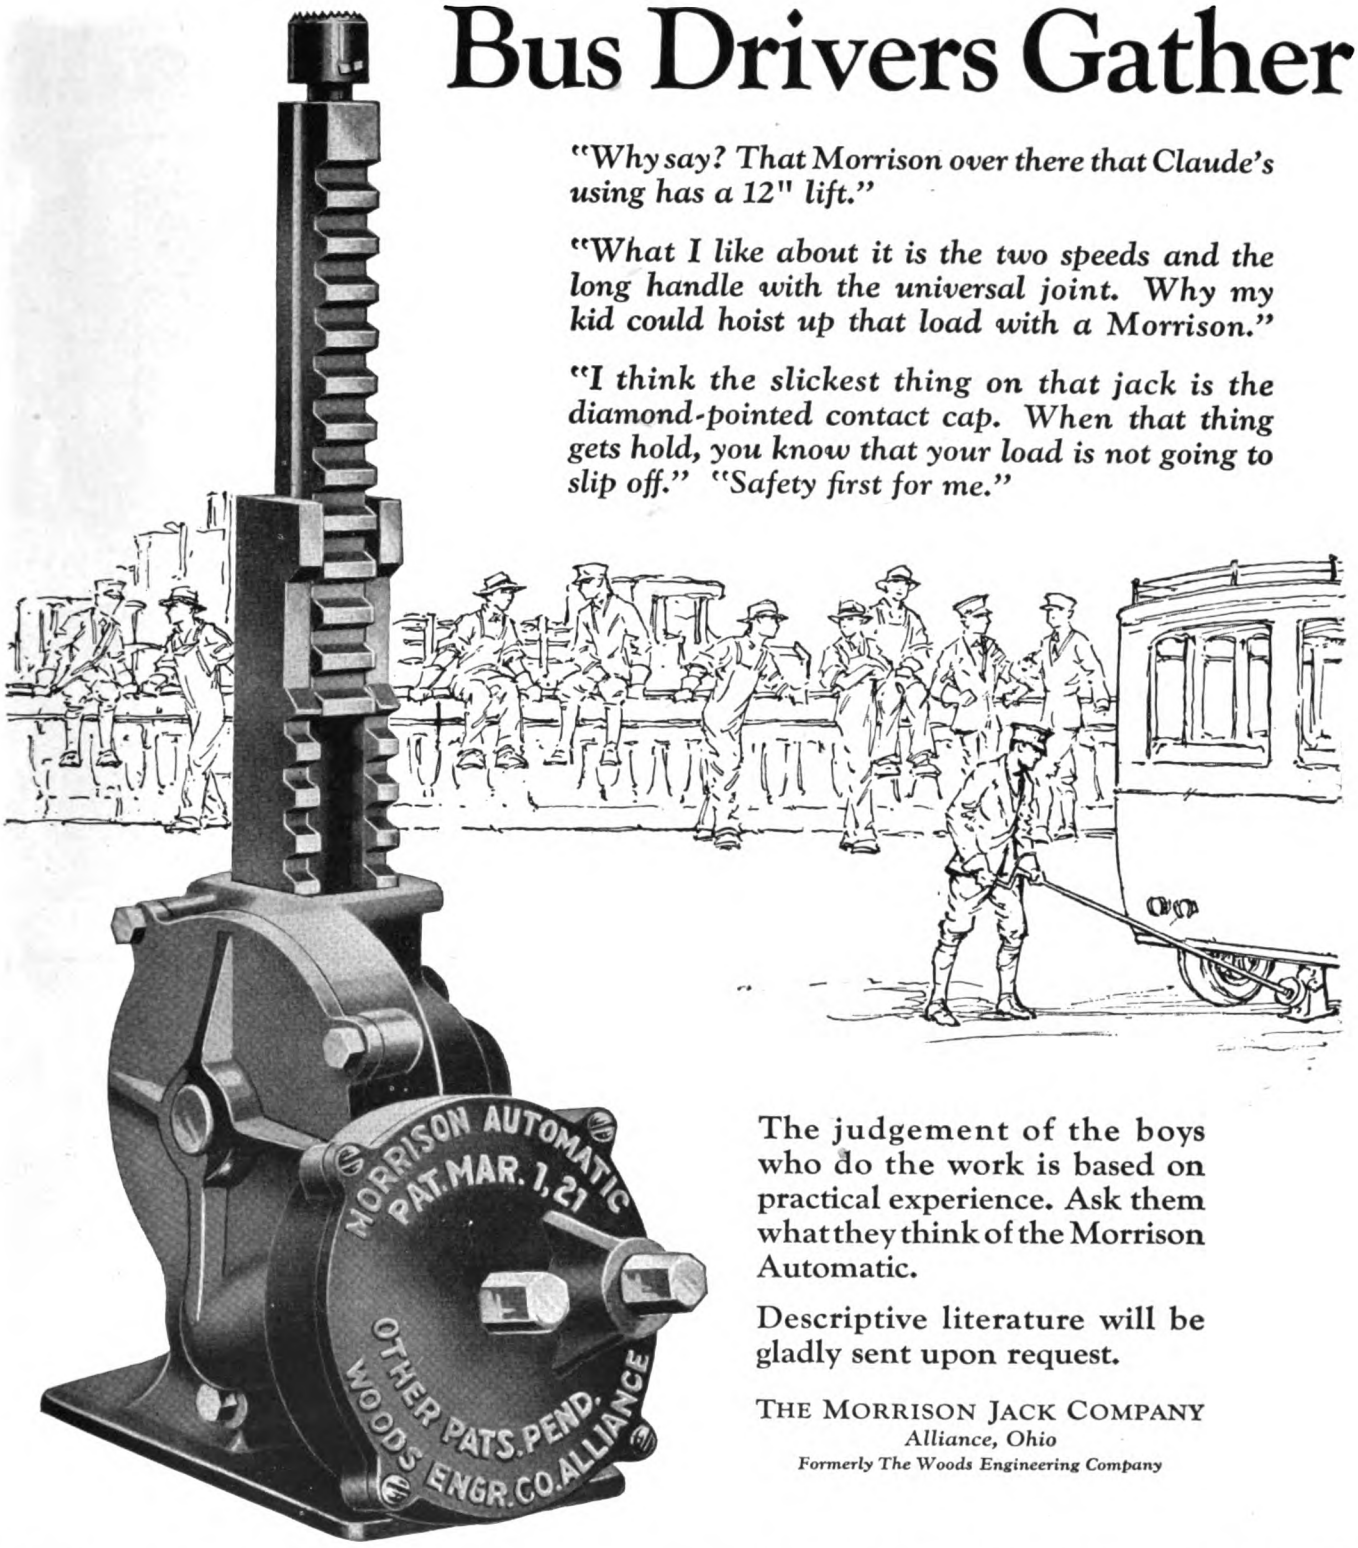
Where Truck and Bus Drivers Gather

"Why say? That Morrison over there that Claude's using has a 12" lift."

"What I like about it is the two speeds and the long handle with the universal joint. Why my kid could hoist up that load with a Morrison."

"I think the slickest thing on that jack is the diamond-pointed contact cap. When that thing gets hold, you know that your load is not going to slip off." "Safety first for me."



The judgement of the boys who do the work is based on practical experience. Ask them what they think of the Morrison Automatic.

Descriptive literature will be gladly sent upon request.
